FINE CERAMIC TILES

Est 1872

RENAISSANCE
distinctly different

Luxury ceramic wall and floor tiles, and mosaics

Welcome to the
Renaissance Collection.

The finest ceramic tiles
sourced from the best
quality manufacturers
around the World.

Our mission is to
offer you the ultimate
collection of luxury
ceramic wall and floor
tiles to design the home
of your dreams.

The products featured in this brochure are a selection of the most popular ranges in the Renaissance portfolio. Visit our award winning showroom in Bridgnorth to see the complete collection and be inspired by the endless potential that tiles can give to your home.

Naturals

PAGES 06 - 59

Taking inspiration from nature, this collection is filled with earthy tones and undulating textures.

Classics

PAGES 60 - 97

Rectified

Wetrooms

Light / Moderate Traffic

Areas that receive normal foot traffic around the home.

Moderate / Heavy Traffic

All residential applications as well as light commercial use.

Heavy Traffic

All residential and most commercial foot traffic areas.

health benefits...

Ceramic surfaces

Ceramic tiles are amongst the most durable, cleanable and long lasting surface finishes available for use around the home.

They are perfectly suited to modern day hygiene requirements and, when paired with a suitable grout tiles support regular and simple cleaning to both remove and prevent the build-up of harmful bacteria on their surface.

Keeping your home clean, safe, and looking beautiful has never been easier!

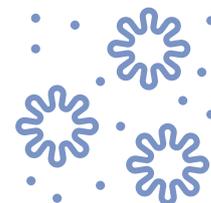

General hygiene

The robust nature of ceramic tiles provides long term durability for the life of the product. Removing dirt and bacteria is easy, simply clean the surface with warm water and detergent diluted to the manufacturers recommendations.

Deep cleaning

Occasionally it is necessary to remove organic stains and mould growth. Unlike some other surface coverings, ceramic tiles can be cleaned using diluted household bleach or for grease, oil and fat, a general household de-greaser can be used (always follow the cleaning product manufacturers guidelines).

Dust and allergens

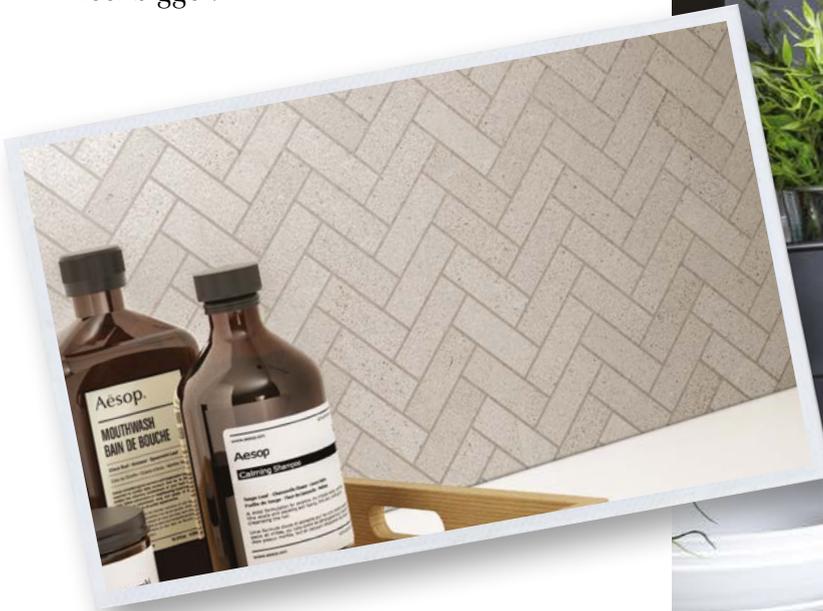

The non porous surface of ceramics ensures that any dust or other allergens do not become ingrained in the material but will remain on the surface until cleaned away, making their removal simple, quick and easy. Ceramic tiles are also free from the volatile organic compounds (VOCs) that can also cause air quality to deteriorate.

SOFT CREAM COLOUR PALETTE

Breathe balance into your home

Off whites, sandy shades and oatmeal tones bring mellow warmth and balance to interiors. For smaller areas consider using the same colour on walls and floors to create a cocooning effect and make your room feel bigger.

Calm & Uplifting

GORGEOUS NEUTRAL PAlettes ARE AT THE HEART OF A CALM AND UPLIFTING INTERIOR. USE RICH ACCENT COLOURS AND WEATHERED WOODS TO CREATE A RELAXED ATMOSPHERE, RECONNECTING WITH NATURE.

Naturals

distinctly different

Inspired by the subtle earthy hues and rugged surface textures of stone and marble, the Renaissance naturals collection is an exquisite selection of traditional rustic slates to contemporary honed limestone finishes, combining beautiful aesthetics with uncompromising functionality.

Naturals

Normandy

The distressed vintage patina of Normandy evokes the look and feel of a French Chateau.

MONOCROMATIC PALETTE

Black is back!

Black doesn't have to be boring, introduce contrast to your home with luxurious dark mosaics or for a pared down vibe use highly reflective surfaces in combination with intriguing matt panels in rich charcoals and navy.

Warming greys

FROM PUTTY TO PEWTER, THE MUTED GREY PALETTE IS FILLED WITH WARMTH AND PERSONALITY. IT OOZES DECADENCE AND STYLE. ADD A CONTEMPORARY TWIST WITH INDUSTRIAL LIGHTING OR JEWELLED ACCENT COLOURS.

Mosaics & Natural Stone

distinctly different

Bringing together an eclectic mix of stone, glass and metal mosaics, the Renaissance Mosaics and Natural Stone Collection is designed to inspire.

Mosaics

Designer Glass

This beautiful collection of designer glass, stone and metal mosaics can be effortlessly set into most wall tile ranges, adding a touch of glamour to your interior.

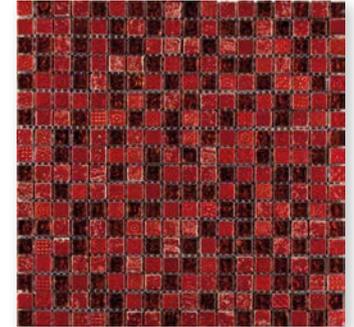

The deep luxurious colours and shimmering accents work to further enhance the beauty of the range.

Supportive Solutions for Tile & Stone

Tile and stone are a beautiful choice for many areas of the home and having made the investment you want them to truly shine and stand the test of time.

This is where Schlüter-Systems can help, with a variety of solutions to prevent cracks, protect edges and add warmth. Stunning materials deserve first-class support and you deserve a life free from hassle.

Schlüter®-DITRA-HEAT-E-DUO

Smart Underfloor Heating That Performs for Tile and Stone

The **Schlüter®-DITRA-HEAT-E-DUO** system simplifies electric underfloor heating installations. It's multifunctional, eliminating the need for numerous different layers, reducing assembly height and allowing you to fit more jobs into your schedule. Plus all kits now come with a smart WiFi thermostat.

Only Schlüter®-DITRA-HEAT-E-DUO can offer:

- ✓ Thermal break - for 70% faster warm-up
- ✓ Impact sound reduction - of up to 13dB, feels like 50% to the human ear
- ✓ Uncoupling - managing movement of the substrate & surface covering
- ✓ Crack-bridging - preventing cracks in the substrate from reaching the surface
- ✓ Waterproofing - keeping moisture from the surface away from the subfloor
- ✓ Vapour pressure equalisation - dependable management of vapour pressure
- ✓ Press-to-lay cable - no adhesive or tape required

Information

Floor Tiles

Ceramic floor tiles, although beautiful to live with and easy to clean, are not indestructible. Reasonable care must therefore be taken in avoiding the fall of household objects, such as pans and cutlery. To maintain the life of the floor foot mats should be provided at external doorways to remove grit from shoes.

If in any doubt about the suitability of a floor tile for a given application please consult your Renaissance Collection retailer.

Glazed ceramic floor tiles are rated according to International Standard ISO 10545-7 into classes of abrasion resistance (ISO PEI Classes). The glazed ceramic floor tiles illustrated in this catalogue are designated an abrasion resistance class as specified by their manufacturer. The following outlines typical installation circumstances for each classification as an approximate guide only:

Class III
Suitable for light domestic use only (not kitchens or hallways or any room which gives direct access to outdoors).

Class IV
Suitable for general domestic use and some light commercial applications.

Class V
Suitable for most, but not all, commercial applications.

Glazed Porcelain (GP)

Products identified with this symbol have a glazed porcelain body. Generally, most glazed porcelain tiles may be used on walls, floors and worktops. Please check with your Renaissance retailer to ensure the product has a surface finish that is fit for the intended application.

Glazed (GP) and Unglazed Porcelain (UGP) Floor Tiles

All glazed or unglazed porcelain tiles require fixing with a polymer modified adhesive due to their low water absorption. We recommend that BAL polymer modified adhesives containing BAL Porcel Bond Plus are used when laying Renaissance Porcelain floor tiles. All BAL adhesive products are covered by a 25 year performance guarantee.

Rectified Tiles

This term is used to describe tiles which have had their edges mechanically squared and precision size calibrated. Such tiles should be installed with care to ensure a flush flat finish is achieved, with a minimum 2mm joint between the tiles for walls and 3mm joint between the tiles for floors.

Wall Tiles

Glazed wall tiles identified with this symbol are only suitable for internal wall tiling applications.

Wetroom Mosaic

Porcelain mosaics identified with this symbol are suitable for internal wetroom floors for domestic applications. For guidance on commercial applications please contact us.

During the manufacture of ceramic wall and floor tiles some variation in shade or pattern can occur. In addition some ceramic wall and floor tiles have a deliberately shaded appearance as part of the design and such qualities should be observed and understood prior to installation.

Similarly natural stone is characterised by its inherent variation and depending upon the type of stone the degree of variation can be significant. In some instances a single sample may not be

representative of the entire batch and further steps should be undertaken to carefully understand the appearance characteristics of the particular product prior to purchase and installation.

Before fixing tiles several cartons should be opened and the contents mixed to ensure that the size, shade, colour and patterning are acceptable.

The colour representations in this brochure are as accurate as the limitations of the printing process

will allow. Please refer to actual product samples from your Renaissance retailer before purchasing.

Every effort has been made to ensure the accuracy of the information given in this brochure, however, we reserve the right to change specifications without prior notice.

All sizes in the catalogue are approximate, please refer to carton packaging for specific work size information.
